

We would like to invite you to participate in an active discussion on

The Green Power Fund: Carbon Negative Technologies for Sustainable Development

An official UNFCCC Side-Event to the RIO+20 UN Conference on Sustainable Development

Monday 18 June 2012, 17.30-19.00

Venue: Room T-5, RioCentro, Avenida Salvador Allende 6555,
Barrada Tijuca, Rio de Janeiro, Brazil

Following a successful AOSIS event at the UN HQ in November 2009, this event will discuss a proposal for a '**Green Power Fund**' (the original concept for 'The Green Climate Fund' which was approved at COP17) addressing the core RIO+20 themes of how to fund the green economy globally partly by using the \$200 BN per year from the Carbon Market of the Kyoto Protocol, thereby ensuring sustainable energy access for all. For more information, please see attached, or visit www.columbiariskmanagement.net

Co-hosted by Columbia Consortium for Risk Management, The Columbia University Earth Institute and Global Thermostat LLC

Featuring keynotes from:

Dr. Graciela Chichilnisky: author of the carbon market mechanism under the Kyoto Protocol and creator of the formal theory of sustainable development

Dr. Peter Eisenberger: former Bell Labs Physicist, and founding Director of the Columbia Earth Institute

**Your participation will be greatly valued. Further speakers will be announced shortly.
Cocktails and canapés will be served.**

To register your attendance, nominate a replacement, or invite additional colleagues, please contact publicity@fmcm.co.uk or telephone +44 2074057422
